OE07

OE07 TEAK OIL is a special blend of oils, ready to use and silicon-free perfect for the protection of outdoor raw wood. It provides a water-resistant veil to the treated surface, with a pleasant natural and not-greasy effect.

Thanks to its special formulation, enriched with appropriate UV filters and additives against weathering and harmful agents, it penetrates deeply, enhancing and the natural beauty of the treated surface.

The finish can be periodically restored very easily.

Remove superficial defects and apply the product directly by spray or brush on a surface free from grease, oil and wax.

Apply more than one coat, at least two, waiting from 4 to 6 hours between consecutive treatments.

After complete drying, the support can be finished with further treatments.

Warning: the product is overpaintable. If overpainting is necessary, please verify compatibility between products.

EASY, FAST, EFFECTIVE!
