EXTERIOR
INTENSIVE CLEANING

Made in Italy

RN43

RN43 HYDRO INTENSIVE EXTERIOR WOOD CLEANER is a waterborne extra strong detergent ready to use, it's the ideal solution for deep cleaning of exterior wood.

Thanks to its special formulation it removes efficiently and carefully from the wood all types of old and weathered coats.

Diluted in water, it allows ordinary cleansing or degreasing cleansing of raw exotic woods..

Shake well before use. Wet uniformly with water the surface to be treated, just to slow down the drying of **RN43 HYDRO INTENSIVE EXTERIOR WOOD CLEANER**. Apply uniformly by brush (from top to bottom, on vertical supports) and leave it work for 15-30min.

If necessary, apply again to keep the support wet, then with a thick synthetic brush remove the dirt. If possible use a high pressure water pump to help the removal.

The detergent may darken the tone of wood; to neutralize this effect wash quickly with **RN42 HYDRO EXTERIOR WOOD CLEANER**, then **rinse well**.

Wait for 24-48hrs the complete drying before proceeding with the new treatment with Brand's oils.

RN42

Intensive waterbased detergent for exterior wood, ready for use. Special for exotic timbers, ideal for the cleansing of decks, garden furniture, pool-sides and linings.

Slightly acid, allows easily to remove in depth encrustations and strong dirt derived from exposition to weathering and direct sunlight.

Can be used with manual or mechanical action, requires rinsing and is not harmful for vegetation.

Shake well before use. Spread abundantly by brush on the surface which needs to be cleaned, let act for some minutes, then brush with a synthetic hand brush and remove the dirt.

Where necessary, repeat the operation.

Once the treatment is over, rinse well with water and let dry, then proceed with light sanding.

The cleaned wood can now be treated with Brand's oils.
